

PeopleSoft's **Software Alliance Partners** extend the power of PeopleSoft solutions with industry-leading business functionality and technology performance.

PeopleSoft Certified Software Integrations are interfaces built by PeopleSoft's Software Alliance Partners and tested and certified by PeopleSoft's Partner Integration Team.

Indus International

Indus Solution Series – PassPort 7.0

PeopleSoft 7.5 Certified Software Integration

Integration Overview

Indus International is the world's largest provider of Enterprise Asset Management (EAM) software and services. The certified software integration of the Indus Solution Series – PassPort to PeopleSoft Financial Management and Human Resources Management provides capital-intensive businesses with a comprehensive, best-of-breed solution to manage all of their assets.

The PassPort 7.0/PeopleSoft 7.5 Certified Software Integration provides customers with the following benefits:

- Fully integrated solution provides more functionality than single vendor EAM/ERP solutions
- Single data entry across the enterprise
- Flexibility of integration

Indus International

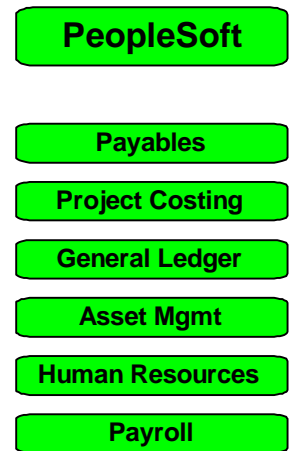

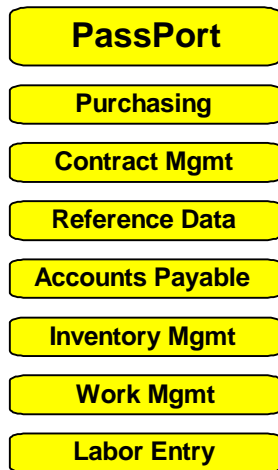

Indus International has produced, installed, and supported the Indus Solution Series for over 20 years. With 1998 revenues of over \$195 million, Indus is the number one global provider of EAM Products and Services. Indus products are licensed by businesses in energy, communications, manufacturing, public sector, and other vertical markets.

PassPort Overview

The Indus Solution Series – PassPort includes Web-based Asset & Work, Materials & Procurement, and Safety & Compliance software modules. Indus also provides fully integrated EDMS, workflow, decision support, asset optimization, and other capabilities. The company licenses baseline integrations with PeopleSoft as well as best-of-breed GIS, CIS, and other applications.

PassPort 7.0/PeopleSoft 7.5 Certified Software Integration

The PassPort/PeopleSoft Integration enables the smooth flow of business functions and data across selected applications to and from PassPort and the PeopleSoft Financial Management and Human Resources Management (Payroll) products. The integrations fall into two categories: Process Touchpoints and Reference Data. Process Touchpoints refer to the creation and processing of financially related transactions. Reference Data consists of values that are used to validate that the financial transactions are properly identified. Benefits of this integration include integrated menuing, panel-to-panel drill-across/drill-down, integrated messaging, and seamless access to PeopleSoft's best-of-class PeopleSoft Query and PS/nVision products.

Integration with PeopleSoft 7.5 Financial Management

The configuration of PassPort 7.0 and PeopleSoft 7.5 Financial Management depends on how the user has installed PeopleSoft, how they intend to integrate the products, and what their business flow is. The flexible integrations are accomplished by PeopleSoft Application Engine processes and/or Indus Financial APIs. One-time entry of all data facilitates the integration, providing users with a seamless work process regardless of which application is being used.

Integration with PeopleSoft 7.5 Human Resources Administration

The integration architecture between PassPort 7.0 and PeopleSoft 7.5 Human Resources Administration is similar to the Financial Management integration. The chosen configuration is based on customer requirements and best business practices.

Master File Synchronization

Synchronization between PassPort and PeopleSoft is flexible and determined by customer requirements.
