

# Indus International PassPort 8.0

A PeopleSoft 7.5 certified software integration.

Smooth flow of business processes and data.

Integrated menuing, panel-to-panel drill-across and drill-down.

PeopleSoft Certified Software Integrations are interfaces built by PeopleSoft Software Alliance Partners and tested and certified by the PeopleSoft Partner Integration Team. The integrations are product release- and platform-specific.

PeopleSoft Software Alliance Partners extend the power of PeopleSoft solutions with industry-leading business functionality and technology performance.

### Indus International

Indus International, headquartered in Pittsburgh, Pennsylvania is the world's largest provider of Enterprise Asset Management (EAM) software and services. The company has produced, installed, and supported the Indus Solution Series—Passport—for over 10 years. Indus products are licensed by businesses in energy, communications, manufacturing, public sector, and other vertical markets.

PassPort 8.0 includes web-enabled Asset and Work, Materials and Procurement, and Safety and Compliance software modules. Indus also provides fully integrated EDMS, workflow, decision support, asset optimization, and other capabilities.

### Certification Description

The certification evaluation involves assessing the integration product in four major areas—scope, design, testing, and documentation. Documentation regarding the scope, design, test cases, and product are submitted for approval. Once approved the integration is tested against the business solutions it supports. Testing areas include installation, unit and system, and data-base platform. Once sign-off has been obtained on the supporting documentation and the integration has passed the testing requirements, it is deemed certified.

### Integration Overview

The PassPort 8.0/PeopleSoft 7.5.2 integration enables the smooth flow of business functions and data across selected applications to and from PassPort and PeopleSoft Financial Management and Human Resources Management (Payroll). The certified software integration provides capital-intensive businesses with a comprehensive, best-of-breed solution to manage all their assets.

The integrations fall into two categories: **process touchpoints**—the creation and processing of financially related transactions—and **reference data**—values used to validate that financial transactions are properly identified.

This fully integrated solution provides more functionality than single vendor EAM/ERP solutions and provides significant additional benefits.

- Single data entry across the enterprise.
- Flexibility of integration.
- The integration is batch.

### Integration with PeopleSoft 7.5 Financial Management

The configuration of PassPort 8.0 and PeopleSoft 7.5.2 Financial Management depends on how the user has installed PeopleSoft, how they intend to integrate the products, and what their business flow is. The flexible integrations are accomplished by PeopleSoft's Application Engine processes and/or Indus' Financial APIs. One-time entry of all data facilitates the integration, providing users a seamless work process regardless of which application is being used.

### Integration with PeopleSoft 7.5 Human Resources Management

The integration architecture between PassPort 8.0 and PeopleSoft 7.5.2 Human Resources Management is similar to the Financial Management integration. The chosen configuration is based on customer requirements and best business practices.

### Master File Synchronization

Synchronization between PassPort and PeopleSoft is flexible and determined by customer requirements.
