

CONTROL-M® for PeopleSoft

PeopleSoft 8 certified software integration.

Best-of-breed scheduling solution.

Leverage your PeopleSoft investment, meet your business objectives.

CONTROL-M is a best-of-breed scheduling solution that addresses your business needs by focusing on applications, integration, and management. It integrates the batch processes running on diverse platforms and applications into a unified business process, thus ensuring smooth operations.

BMC Software, Inc.

BMC Software, Inc. (NYSE: BMC), with offices worldwide is the leading provider of enterprise management solutions. By Assuring Business Availability®, BMC Software delivers control over infrastructure management costs, control of market advantage and differentiation via service management, and growth of business value with solutions for business optimization. BMC Software is a member of the S&P 500, with fiscal year 2001 revenues exceeding \$1.5 billion. For more information, please visit BMC Software's web site at www.bmc.com.

Integration Overview

The CONTROL-M best-practices technology seamlessly integrates PeopleSoft with the other systems in your organization to ensure complete and efficient business process management. This tight integration is vital in attaining smooth operations and maintaining the production flow.

By closely relating to internal PeopleSoft mechanisms and data, CONTROL-M can track, control, and retrieve information from PeopleSoft

jobs that were not defined within CONTROL-M. Furthermore, CONTROL-M supports all the various PeopleSoft job types, such as Application Engine, SQR, COBOL, and Crystal Reports, and uses the PeopleSoft ability to execute jobs on various predefined PeopleSoft servers.

CONTROL-M's certified Business Integrated Scheduling solution for PeopleSoft:

- Integrates PeopleSoft with production scheduling across a multitude of platforms and applications.
- Enhances the PeopleSoft scheduling facilities.
- Tracks PeopleSoft jobs defined in PeopleSoft, for a consolidated enterprise-wide view.
- Manages the entire business flow via a focal point of management.

CONTROL-M for PeopleSoft 8 Certified Software Integration

CONTROL-M for PeopleSoft enhances the PeopleSoft scheduling capabilities in compound business environments. CONTROL-M provides dynamic cross-platform and cross-application scheduling capabilities—such as job dependencies, parameter transfer, advanced calendars, and status-based job executions—maximizing process automation and efficiency.

CONTROL-M offers superior scheduling administration and management capabilities via its Enterprise Manager. It provides a graphic focal point of control for your entire business flow—from all operating systems and applications, including integrated PeopleSoft jobs. Thus,

CONTROL-M eliminates the need for multiple interfaces and provides the means for creating and planning even the most complicated business flows, efficiently.

Availability

Certification Environment

Hardware: HP

Software: PeopleSoft 8, PeopleTools 8.16

Partner product: CONTROL-M for PeopleSoft 8

Database platform: Oracle 8.1.6

Operation system: HP-UX

PeopleSoft Certified Software Integrations

When PeopleSoft conducts certification testing, we verify only that the software integration functions according to the partner's test plan, and

that it makes appropriate use of PeopleSoft components and integration technologies in the environment specified in the published Certification Datasheet. Certification applies only to the components providing integration between the partner's software and PeopleSoft software; it does not apply to or extend to the partner's software product(s). Certification is performed in a lab environment using uncustomized versions of PeopleSoft and the partner's software. Certification testing is product version specific, hardware specific, database specific, and operating system specific, and is conducted in English, unless explicitly noted otherwise. Similar results may not be able to be duplicated in a production environment, including where the PeopleSoft or partner software is modified or customized upon implementation. Customers are solely responsible for the selection of all third-party software, including any integration software, used in conjunction with PeopleSoft software and for the results of such use. For the functional and environmental details on a certified integration, refer to the partner's Certification Datasheet, found in the Alliances section of the PeopleSoft Web site at www.peoplesoft.com.
